PROFILE

Computer Programming graduate (Algonquin College, GPA 3.90) with 6+ years of software QA experience in the game industry and a prior degree in Information Management. Builds secure Java and Python web applications: Spring Boot REST APIs with JWT authentication, Jakarta EE services with JPA, and Flask applications on PostgreSQL. Strong in relational databases (Oracle PL/SQL, MySQL, PostgreSQL) and one of few recent graduates with hands-on COBOL. Seeking a junior developer, QA analyst, or database role where reliability, security, and accurate documentation matter, with a strong interest in public-sector work.

TECHNICAL SKILLS

Languages:	Java 17+, Python, SQL / PL/SQL, JavaScript, HTML5, CSS3, PHP, COBOL, Dart
Backend & web:	Spring Boot, Spring Security (JWT), Jakarta EE (JPA/Hibernate, JAX-RS REST, JSF, Servlets/JSP), Flask/Jinja2, Bootstrap 5, RESTful API design
Databases:	PostgreSQL, MySQL, Oracle (PL/SQL, JSON), MS SQL Server, MongoDB, Neo4j
Testing & QA:	JUnit 5, integration testing, HTTP/Postman API tests, test case design, regression and localization QA, Jira defect tracking
Tools & platforms:	Git/GitHub, Maven, Docker, Apache Tomcat, Linux, IntelliJ IDEA, Eclipse, NetBeans, VS Code, Android Studio, Render, GitHub Pages, ZenHub, Wireshark
Practices:	Agile/Scrum, MVC, DAO/DTO, Singleton, role-based access control, UML, requirements analysis
Spoken languages:	Mandarin (native), English (fluent), Japanese (JLPT N2), French (intermediate)

SELECTED PROJECTS

Public Service Application & Case Management System (PSACMS) Personal project, 2026

Spring Boot, Spring Security, JWT, MySQL, JavaScript SPA, Bootstrap 5, Docker, Render, GitHub Pages

- Designed and built a full-stack case management system modelled on government intake workflows, with separate citizen (submission) and officer (review) portals.
- Implemented stateless JWT authentication and role-based authorization; enforced a status state machine (Submitted, Under Review, Approved/Rejected) in the service layer.
- Added an append-only audit history table recording every status change and the acting user, so decisions are traceable.
- Centralized error handling with a global exception handler; deployed the API to Render and the SPA to GitHub Pages; wrote end-to-end HTTP test scripts.

Cleaning Rotation Tracking System for Nettoyage Eco Vert Capstone, Algonquin College, May – Aug 2026

Python, Flask, PostgreSQL, Jinja2, Flask-Login, ZenHub

- Five-person Scrum team delivered a mobile-friendly web application for a real cleaning company, replacing manual tracking of rotational tasks across client properties; accepted by the client through a signed validation report.
- Owned the rooms, rotations, tasks, and preset-template module (Flask blueprint, forms, and templates), the shared PostgreSQL connection layer, and the preset task seed data.
- Wrote and executed test cases across two prototypes; created and tracked ZenHub issues, sprint reports, and control charts.

ACME College Enterprise System Course project, Summer 2026

Jakarta EE, JPA/Hibernate, JAX-RS, JSF, MySQL, JUnit 5, Postman

- Worked on the secured REST backend in a four-person team split between REST and JSF; coordinated entity synchronization and API contracts with the frontend pair.
- Implemented JPA entity mappings and relationships, authentication and role-based authorization, Course and Professor CRUD resources, and course-registration business logic.
- Solely authored a 27-test JUnit integration suite covering CRUD, security roles, and business rules; 27/27 passing at submission.

Library Management System Personal project, 2026

Java 17, Servlets/JSP, JDBC, MySQL, Apache Tomcat

- Designed the database schema and backend; implemented full CRUD, role-based access with servlet filters, circulation, and late-fee logic.
- Managed manual JDBC transactions (commit/rollback) so multi-table operations stay atomic; applied MVC, DAO, DTO, and Post-Redirect-Get patterns.

Other coursework: Game version history database (Oracle PL/SQL package, views, triggers; MS Access/VBA front end); JSON storage and retrieval in Oracle 26 (group research report); EV data console app (Java, JDBC, DAO/Singleton); Android and Flutter mobile apps; COBOL business programs; socket network programming.

EXPERIENCE

Machine Learning Specialist (On-Call), RWS Group Remote | May 2023 – Present

- Evaluate and annotate AI training data and model outputs in Mandarin, and English against project quality guidelines for machine-learning projects.

Localization QA Tester, GlobalStep Montreal, QC | Jun 2020 – Dec 2024; Feb – Sep 2018

- Tested game builds for the Traditional Chinese market: executed test passes, logged defects in Jira with reproduction steps and evidence, and verified fixes in subsequent builds.
- Reviewed in-game text and audio for linguistic, contextual, and cultural accuracy; maintained terminology glossaries and QA checklists in Excel.
- Stepped in for translators when needed, translating English source text into Traditional Chinese to meet urgent requests.
- Collaborated with lead testers and development teams across release cycles to keep quality consistent across all media formats.

Localization Tester (On-Call), Altagram Group – Game Localization Montreal, QC | May 2019 – May 2020

- Performed Traditional Chinese linguistic QA on game titles; reported and verified localization defects to project quality standards.

Graphic Design Intern / Junior Designer, Midway Industries Montreal, QC | Jan – Mar 2020

- Produced brochures and catalogues in Illustrator and retouched product photos in Photoshop to brand and print specifications.

Administrative Assistant, Taipei Medical University Hospital Taipei, Taiwan | Apr 2008 – Mar 2013

- Entered and verified patient records in the hospital database; ran month-end data reviews for accuracy and compliance with hospital standards.
- Prepared accreditation, evaluation, and grant documentation; coordinated monthly physician meetings and recorded minutes.

EDUCATION

Algonquin College – Ottawa Jan 2025 – Aug 2026

Ontario College Diploma, Computer Programming

Rosemont Technology Centre – Montreal 2020

Diploma of Vocational Studies, Computer Graphics

ECC Kokusai College of Foreign Language – Osaka 2017

Certificate, International Business

China University of Technology – Taipei 2006

B.Sc. in Management, Information Management

Professional development (LinkedIn Learning, 2026): Software Testing Foundations: Test Techniques; Agile Foundations; Agile Development Practices; Project Management Foundations: Requirements; Agile at Work series.
